What is this product?

Type: Sub-fund of Euromobiliare International Fund (the "Sicav").

Term: The term of the sub-fund is unlimited. The Company may decide to terminate the sub-fund by liquidation or merger under certain circumstances.

Objectives: The Sub-Fund aims to maximise the total return on investment through a diversified portfolio with a Temporary Horizon as at on the 30 June 2025. The Sub-Fund net assets may be invested: a. up to 100%, in bond-type securities and/or money markets instruments with a rating equal or greater than BBB- (« Investment grade »); b. up to 100%, in bond-type securities and money markets instruments with a rating below BBB- (« non Investment grade »); c. up to 20% in convertible bonds, and/or in contingent convertible bonds (CoCo); d. up to 20% in unrated bonds; e. up to 30%, in bond-type securities and money markets instruments issued by issuers having their registered office or who carry out their main activity in the emerging markets countries or by sovereign issuers of such countries; f. up to 10%, in units of UCITS and/or UCI; g. up to 20%, in ABS/MBS and CMBS. For indication purposes, the average rating of the portfolio will be BB+, it may decrease depending on investment opportunities likely to arise as a result of the change in the volatility conditions of the bond markets and which may contribute to achieving the performance objective of the Sub-Fund. The Sub-Fund will not invest in distressed defaulted securities. The duration is normally, between 6 and less than 1 year and will be decreasing as the Temporary Horizon is approached, without this making the Sub-Fund a monetary fund. The Sub-Fund may, additionally, hold ancillary liquid assets, under section 5.A.5) of the Prospectus. For investment and cash management purposes and/or in case of adverse market conditions, the Sub-Fund may hold cash equivalents, such as deposits and money market instruments with a residual maturity of less than 12 months. The Sub-Fund has the option of using foreign exchange risk hedging techniques. The Sub-Fund may invest in derivative products, such as Options, Futures on interest rates, CDS, CDX and IRS, and enter in securities lending transactions, for hedging and investment purpose. The Sub-Fund is actively managed without reference to a benchmark. The I shares are accumulating, income from investments is reinvested. You can request the redemption of some or all of your shares on any bank business day in Luxembourg.

Depository: BNP Paribas S.A. (Luxembourg Branch).

Further information: Assets and liabilities of each sub-fund of the SICAV are segregated. You may exchange your investment in share(s) of this sub-fund for an investment in share(s) of another sub-fund of the SICAV. For further information about the share class you may refer to the prospectus, to the last available annual or semi-annual financial reports. These documents are available and free of charge at the registered office at the SICAV, on the website www.eurosgri.it, as well as at the Management Company, Placement Agent in the marketing countries.

Price Publication: The net asset value of the sub-fund is published daily on the website www.eurosgri.it.

Intended Retail Investor: The sub-fund is intended for retail investors, with a basic knowledge of and/or a average experience of investing in funds seeking to create or optimize the value of their investment, with a short investment horizon. The investor can bear losses (up to the total loss of the invested capital) and does not consider the capital protection as important.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are very unlikely to impact the

capacity of issuer to pay you.

Additional risk relevant for the sub-fund, not included in the risk indicator:

- *Counterparty risk* : risk of loss in the event of default by a counterparty on instruments or contracts (e.g.: OTC derivatives).
- *Liquidity risk* : markets characterized by low volumes may cause difficulties in the valuation and/or trading of certain assets.
- *Credit risk* : possibility of unexpected losses if an issuer of debt securities in which the sub-fund is invested is unable to meet its payment obligations.
- *Emerging markets risk* : emerging markets are generally more sensitive to risk events such as changes in the economic, political, tax and legal environment as well as cases of fraud.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. What happens if Euromobiliare Asset Management SGR SpA is unable to pay you?

Between shareholders, each sub-fund is intended to represent a separate entity with its own rights, capital gains, losses, charges and fees. The assets and liabilities of the sub-fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. However, if the sub-fund is unable to pay what is owed, you could lose the entire investment as there is no guarantee or compensation system.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables below show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- that you would get back the amount that you invested in the first year (0% annual return). For the other holding periods we have assumed that the product performs as shown in the moderate scenario;
- that 10.000 EUR per year is invested.

	If you exit after 12 months
Total Costs	€ 99
Annual cost impact (*)	1.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 1% before costs and 0% after costs.
